Another step in the development of your business

Repsol Resistex®

Resistance. Performance. Results
Adding extra resistance to your business

Repsol takes another step in differentiating its solutions

High resistance to tearing and puncture
Excellent transparency
Excellent gloss
Multiple applications for food packaging, industrial and agricultural film; and insulation for power cables

Over 8 decades of experience
in the world of energy

One of the largest energy companies worldwide and one of the biggest private oil & gas companies.

Repsol is committed to our customers’ global strategy putting our entire organization at their disposal to achieve a common goal: to create long-term relationships which enable us to rise to the common challenges our business presents.
Over 95 countries where we market our products

Added value
Repsol’s Chemicals Division, with a high degree of integration, focuses its strategy in the constant generation of value through differentiated products and services.

Base petrochemicals: ethylene, propylene, butadiene and benzene.

Intermediate products: styrene, propylene oxide, polyether polyols, and propylene glycols.

Polyolefins: polypropylene (PP) and PP compounds, both high and low-density polyethylene (HDPE and LDPE), metallocene linear low density polyethylene (mLLDPE), ethylene vinyl acetate (EVA) and ethylene butyl acrylate (EBA) copolymers.

Over 1,500 references
Repsol manufactures a wide variety of products, ranging from base petrochemicals to derivatives.

Over 100 scientists and researchers working for you
Repsol’s commitment to R&D is an evidence of the company’s aim to attain business excellence to meet future horizons.
## Metallocene linear low density polyethylene (mLLDPE)

Food packaging film

**Transparency**
Greater sharpness and gloss for your products.

**Seal strength**
More reliable, secure seals.

**Processable co-extrusions**
Combinable in multilayer films and in LDPE blends.

**Odourless and tasteless**
Improves organoleptic properties thanks to a lower presence of catalytic residues and optimized formulation.

**Low temperature seal initiation**
High production speed without deterioration.
Tear resistance
Increased safety and performance.

Resistance to puncture
Safer packaging preventing breakage.

Low temperature seal initiation
Less packaging time and energy saving.

Downgauging
Saving material while maintaining mechanical properties.

Impact resistance
Greater protection and reliability.
Repsol Resistex® Agricultural film

- **Tear resistance**
  High reliability and profitability.

- **Flexibility and resistance**
  High elasticity and durability under adverse conditions.

- **Breaking strength**
  High tenacity, safety and profitability.

- **Downgauging**
  Cost savings and environmental sustainability.

- **High transparency**
  Greater optimization of light and efficiency.
Excellence is intrinsic to Repsol’s values. It infuses our daily work and helps guide our decisions and actions, contributing to achieve the commitment made to our customers, stakeholders, employees, suppliers / partners and society to build a better future.

Safety is our priority

Petrochemical complexes, packaging facilities and logistics centres all have OHSAS 18001.2007 (Occupational Health and Safety Assessment Series) certification for their rigorous safety measures.

Technical Data Sheets and MSDS are available on: www.repsol.com

Repsol offers grades of excellent properties specially designed for applications with strict quality requirements.
At Repsol we understand that innovation goes beyond developing new solutions for your business. We pride ourselves on our commitment to serving your needs.

Quality
All petrochemical plants are compliant with the current ISO 9001:2015 standards, for the quality of processes from manufacture to distribution, transport management and end product warehousing.

Environment
We set up and deploy ambitious energy efficiency programmes to reduce energy consumption and GHG emissions as one of the key elements of our strategy. These programmes pursue long term targets which have been made public in order to facilitate their progress by the stakeholders. In this sense, Repsol Química has attained a final reduction of 0.56 million tonnes of GHG emissions at the end of the 2006-2013 period. Repsol is currently working on a new target covering the period 2014-2020, that involves an additional reduction of 0.42 million tonnes of CO₂. All petrochemical complexes, have ISO 14001 certification for their environmental management and the reduction of the impact of their facilities; and ISO 14064 for the annual verification of greenhouse gas (GHG) emissions. The Chemical area of our complexes in Tarragona (2015), Puertollano (2013) and Sines (2016), has implemented an Energy Management system according to the requirements indicated in the International Standard ISO 50001. This system is dedicated to developing and implementing our organization’s energy policy, as well as manage the energy aspects of our activities, products or services. The objective is to increase and improve our energy efficiency, based on systems’ implementation aimed at continuous energy performances improvement and thus contribute to a more efficient and sustainable use of energy. Repsol reinforced its commitment with sustainability by signing the “Paris Pledge for Action” document. An historical agreement in which both developed countries and less developed countries and companies engaged to contribute towards a low CO₂ emission economy.
