

Film

Repsol Alcudia / Repsol PE Ultraclean® / Repsol Resistex®
Repsol Primeva® / Repsol Ebantix® / Repsol Isplen

REPSOL

Trusting
differentiation
to make you
unique

Repsol Alcludia

- / PE grades for high performance shrink film with excellent optical properties, increased rigidity and high processability.
- / Easy-tear grade for the hygiene segment.
- / Grades optimized for extrusion coating systems.

Repsol PE Ultraclean[®]

- / Range of LDPE products with very low gel content.
- / Analysis in continuous compliance with the strictest standards of quality.

what we add

GRADES VALUE TRUST

Repsol Resistex[®]

- / mLLDPE grades with high transparency and gloss: sharper view in packaging of products.
- / Low seal initiation temperature: saving energy and time.
- / High tear resistance: higher security and performance of containers.

Repsol Primeva[®] and Repsol Ebantix[®]

- / Wide range of EVA/EBA copolymers for film and stretch sleeves, agricultural film and extrusion coating.
- / Excellent optical and mechanical properties with good adhesion to different substrates (PE, PET, etc.).
- / Combinable in multilayer films, extrusion.

Repsol Isplen

- / Extensive range of PP for cast film, blow molding and BOPP film: rigidity, cold impact resistance, stretchability and low sealing temperature.
- / Specialties: peelable, matte-look, high-quality film grades for co extrusion.
- / Grades suitable for metallisation.

Repsol

Over **8** decades of experience
in the world of energy

One of the largest energy companies worldwide
and one of the biggest private oil & gas companies.

Chemicals

Over **95** countries
where we market our products

Added value

Repsol's Chemicals Division, with a high degree of integration, focuses its strategy in the constant **generation of value** through **differentiated products and services**.

Over **1,500** references

Repsol manufactures a wide variety of products, ranging from base petrochemicals to derivatives.

Base petrochemicals: ethylene, propylene, butadiene and benzene.

Intermediate products: styrene, propylene oxide, polyether polyols, and propylene glycols.

Polyolefins: polypropylene (PP) and PP compounds, both high and low density polyethylene (HDPE and LDPE), metallocene linear low density polyethylene (mLLDPE), ethylene vinyl acetate (EVA) and ethylene butyl acrylate (EBA) copolymers.

Over **100** scientists and researchers
working for you

Including qualified personnel specialised on Product Stewardship.

Repsol's commitment to R&D is an evidence of the company's aim to attain business excellence to meet future horizons.

Repsol Alcludia / Repsol PE Ultraclean[®] / Repsol Resistex[®]
Repsol Primeva[®] / Repsol Ebantix[®] / Repsol Isplen

Understanding your needs

At Repsol we are committed with the development of new products for our clients. We are in constant search of **innovative solutions to meet all your needs**. Our goal is to develop cutting-edge products to offer **reliable and quality solutions** to enhance your business. Due to this vision Repsol displays one of the widest ranges of film in the market.

Over **40** years of experience
in the market

During our 43 years, we have developed an integrated chemical business. This way at Repsol we control all **key factors of the value chain**: research, development, manufacturing and distribution.

Over **75** grades
for film

Our versatility allows us to produce one of the most extensive ranges of copolymers in the market for a wide range of industrial sectors like:

Agriculture

Automotive

Well-being &
consumer products

Building &
Infrastructure

Packaging

Healthcare

Household

To innovate is to add value

Variety

Wide range of polyolefin grades for film: LDPE, HDPE, mLLDPE, EVA, EBA and PP.

Multiple applications of film in food packaging, industry and agriculture.

Properties

Excellent optical and mechanical qualities.

High processability.

Service

Solutions tailored to each customer.

Additives designed to meet the specific needs of each application.

Safety

Food safety is our priority. We anticipate the most stringent regulations and requirements. Our Tarragona industrial complex is the **1st Centre for polyolefins production with the FSSC 22000 certification.**

Our customers are free to use our **food safety assessment** service: regulations, legislation, certifications, migration tests, REACH.

Commitment

Repsol offers you its full capacity for **innovation for the continual improvement** of its products.

Strict compliance with the regulations and requirements of each application.

Excellence is intrinsic to Repsol's values. It infuses our daily work and helps guide our decisions and actions, contributing to achieve the commitment made to our customers, stakeholders, employees, suppliers/partners and society to build a better future.

Safety is our priority

Petrochemical complexes, packaging facilities and logistics centres all have OHSAS 18001.2007 [Occupational Health and Safety Assessment Series] certification for their rigorous safety measures.

Technical Data Sheets and MSDS are available on: www.repsol.com

Environment

We set up and deploy ambitious energy efficiency programmes to reduce energy consumption and GHG emissions as one of the key elements of our strategy. These programmes pursue long term targets which have been made public in order to facilitate their progress by the stakeholders. In this sense, Repsol Química has attained a final reduction of 0.56 million tonnes at the end of the 2006-2013 period. Repsol is currently working on a new target covering the period 2014-2020, that involves an additional reduction of 0.42 million tonnes of CO₂.

They also, all petrochemical complexes, have ISO 14001 certification for their environmental management and the reduction of the impact of their facilities; and ISO 14064 for the annual verification of greenhouse gas (GHG) emissions.

The Chemical area of our complexes in Tarragona (2015), Puertollano (2013) and Sines (2016), has implemented an Energy Management system according to the requirements indicated in the International Standard ISO 50001.

This system is dedicated to developing and implementing our organization's energy policy, as well as manage the energy aspects of our activities, products or services. The objective is to increase and improve our energy efficiency, based on systems' implementation aimed at continuous energy performances improvement and thus contribute to a more efficient and sustainable use of energy.
