

Specialities

Description

The formulation of the Redevas Products is based on mixtures of paraffin and oils in order to obtain a homogeneous mixture of both without separating phases.

Technical vaselines Redevas are used as lubricants, anti-corrosion protectors, anti-humidity barriers, etc of metallic pieces.

Applications

Technical vaselines Redevas are used as filament vaselines for inks, for the manufacturing of masterbatches for rubber, as products for apparatuses refilling and assembly, as protection of metallic surfaces against corrosion, as base for the manufacturing of shoe creams for shoes and underside of cars.

Technical characteristics

	UNIT	METHOD	B-165	A-165
ASTM Colour	-	ASTM D 1500	< 0.5	< 1
Saybolt Colour	-	ASTM D 156	+15	-
Melting point	°C	ASTM D127	58-62	58-62
Viscosity at 100 °C	cSt	ASTM D445	3-7	4-7
Penetration at 25°C	mm/10	ASTM D 937	155-175	165
Absorbance 290 nm	-	IT.PAL.112	< 0.5	< 0.75

Packaging

In 200 Kg drums and in bulk
