

Based on economic, social and environmental performance during 2012

## **REPSOL, WORLDWIDE ENERGY LEADER IN THE DOW JONES SUSTAINABILITY INDEXES FOR A SECOND CONSECUTIVE YEAR**

- **The company leads the European and worldwide indexes.**
- **Repsol is the only oil and gas company in the history of the Dow Jones Sustainability Indexes to lead the rankings for two consecutive years.**
- **Repsol obtained the best score of the 15 companies that were included in the index from a total 125 tested.**

Repsol leads, for a second consecutive year, the ranking of oil and gas companies of the worldwide Dow Jones Sustainability Index (DJSA World) as well as the Dow Jones Sustainability Index Europe (DJSI Europe).

Of the 125 oil and gas companies examined, only 15 have been included in the global index (Dow Jones Sustainability Index World) led by Repsol for its social, economic and environmental performance during 2012.

Only five European oil and gas companies of 18 examined in total were included in the European index Dow Jones Sustainability Index Europe.

The Dow Jones Sustainability Indexes are published annually following a rigorous analysis of companies' performance of based on economic, social and environmental criteria.

In the 2012 edition, Repsol has achieved the highest score in transparency, risk management, clean fuels, climate change strategy, environmental management, human capital development and social impact.

Since its inclusion in the DJSI in 2006, Repsol has always been amongst the best companies in its industry. The scores obtained are a result of the effort made throughout the company, driven by its management team, to improve performance, demonstrating Repsol's unequivocal commitment to transparency, corporate responsibility and ethical, environmental and social.

### Repsol's scores since its inclusion in DJSI:

	2006	2007	2008	2009	2010	2011	2012
Repsol	76	74	77	78	75	86	85
Best Oil&Gas	77	77	80	82	77	86	85

### About Dow Jones Sustainability Index

The Dow Jones Sustainability Index is a family of indexes whose members must demonstrate advanced practices in the different areas that constitute corporate responsibility, including corporate governance, risk management, climate change strategy, or attraction and retention of talent within its organization.

Only 10% of the 2,500 companies that make up the Dow Jones Global Index, made up of listed companies in major markets throughout the world, are included of the Dow Jones Sustainability Index, after passing a rigorous review and selection process.

Since their creation in 1999, DJSI has become one of the main and most prestigious manifestations of a trend that has become known as sustainable investment or socially responsible investment.
