For his strategic vision and Repsol's trajectory, especially after the fallout from the confiscation of YPF

ANTONIO BRUFAU NAMED CEO OF THE YEAR AT PLATTS GLOBAL ENERGY AWARDS

- A committee of industry experts selected Repsol Chairman and CEO Antonio Brufau from nearly 200 nominees. These awards are considered one of the most prestigious in the energy industry.
- The jury has valued Antonio Brufau's strategic vision and leadership to successfully direct Repsol's trajectory, especially after the fallout from the confiscation of YPF.
- Platts is the world's leading agency specialised in providing information on energy, petrochemicals and metals, and has more than a hundred years of history.
- Platts highlighted the transformation registered in Repsol in recent years, during which it has become a world leader in exploration and has made five of the most important hydrocarbon discoveries in the world. In addition, the company has recently developed the largest industrial project in Spain, which has placed its downstream area at the forefront of European refining systems. Along with this transformation, Repsol has also created exemplary human resources and environmental management policies.
- Repsol is well known for its commitment to innovation and technology, this has already been recognised by Platts in 2009, when the company won the "Commercial Technology of the Year award" and in 2004, when it was awarded the "best engineering project of the year".

Repsol Chairman and CEO Antonio Brufau received the CEO of the Year at the Platts Global Energy Awards, an annual award held in New York recognising industry leadership, innovation and excellence in the energy industry.

Antonio Brufau was recognised for his strategic vision and leadership in maintaining and promoting the company's successful growth while managing the fallout from the confiscation of YPF in April 2012. Platts especially valued Brufau's delivery of a clear and concise strategy and transformative leadership.

Brufau was selected from nearly 200 nominations by a committee of industry experts that determine the winner of the awards hosted by Platts, the leading global energy, petrochemicals and metals information provider with more than one hundred years of history. Winners of previous editions include executives from several of the major energy companies in the world.

Platts highlighted the transformation registered in Repsol in recent years, during which it has become a world leader in exploration and has made five of the most important hydrocarbon discoveries in the world. In addition, the company has recently developed the largest industrial project in Spain, which has placed its downstream area at the forefront of European refining systems. Along with this transformation, Repsol has created exemplary human resources and environmental management policies.

Platts recognised Repsol in 2009 when it won the "Commercial Technology of the Year" award, for its kaleidoscope project of innovative technology used for hydrocarbon exploration. In addition, in 2004, the company was awarded the "best engineering project of the year" for the technology developed for the Prestige oil recovery, also recognising its solidarity and altruism, despite not having any relationship with the ship or its cargo.
