

2021

Waste management and circular economy

Repsol acts throughout the value chain to prevent the generation of waste and mitigate the environmental impacts that may result from its activity, its supply chain or the use of its products and services. This action includes the implementation of different circular economy projects for the recovery of waste at our facilities or in collaboration with external waste management services and other entities. The following infographic describes Repsol's waste management in accordance with the requirements established by the Global Reporting Initiative (GRI).

* In 2021 Recycling includes incineration with energy recovery and composting treatments, in accordance with GRI 306 (2016).

** In 2021 Other disposal operations includes incineration without energy recovery.
