Repsol's Contributions to public consultations and roadmaps

2020-2025

Responses to the European Commission's Public Consultations and Roadmaps

The consultations listed below refer exclusively to those submitted directly by Repsol to the European Commission and officially recorded in the EU Transparency Register.

2025

Technological neutrality:

- Future of the European automotive industry
- Interim evaluation of the Strategic Technologies for Europe Platform (2024-2025)

Investments for the energy transition:

- New State aid Framework accompanying the Clean Industrial Deal Communication
- Connecting Europe Facility 2021-2027 – interim evaluation

2024

Renewable electrification:

- Renewable energy – guidance on designating renewables acceleration areas
- Innovative forms of solar energy deployment – recommendation to promote their development
- Priority list for the development of network codes and guidelines on electricity for the period 2024-2027 and on gas for 2024 and beyond

Technological neutrality:

- Car labelling – evaluation
- Greening corporate fletes

Just transition:

- Social Climate Fund – guidance on applying the 'do no significant harm' principle

Renewable fuels:

- Methodology to determine the greenhouse gas (GHG) emission savings of low-carbon fuels

2023

Renewable electrification:

- Electricity market – reform of the EU's electricity market design
- Renewable energy – report on the opening up of support schemes
- REPowering the EU with Hydrogen Valleys (roadmap)

Carbon pricing:

- Polluter Pays Principle – fitness check of its application to the environment

Net zero emissions by 2050:

- EU climate target for 2040

CCUS:

- Industrial carbon management – carbon capture, utilisation and storage deployment

2022

Technological innovation:

- [Digitalising the energy sector – EU action plan](#)

Technological neutrality:

- [Reducing carbon emissions – review of emission standards for heavy-duty vehicles](#)

Nature-Based Climate Solutions:

- [Certification of carbon removals – EU rules](#)

Circular economy:

- [Food waste – reduction targets](#)

2021

Carbon pricing:

- [Climate change – updating the EU emissions trading system (ETS)](#)

Technological neutrality:

- CO2 emissions for cars and vans – revision of performance standards

Renewable electrification:

- EU renewable energy rules – review

Paris Agreement:

- Industrial emissions – EU rules updated
- Climate change – new rules to prevent methane leakage in the energy sector

Natural gas as a decarbonization vector:

- Gas networks - revision of EU rules on market access

Energy efficiency:

- Energy efficiency – Revision of the Energy Performance of Buildings Directive

Technological neutrality:

- Sustainable transport – new urban mobility framework
- Gas networks - revision of EU rules on market access
- VAT rules for financial and insurance services – review

Investments for the energy transition:

- Trans-European transport network (TEN-T) - revised guidelines

Technological innovation:

- Digitalising the energy sector – EU action plan

2020

Technological neutrality / Renewable fuels:

- [Low-emission vehicles – improving the EU's refuelling/recharging infrastructure](#)

Transparency:

- [Corporate Sustainability Reporting](#)

Net zero emissions by 2050:

- [2030 Climate Target Plan](#)

Investments for the energy transition:

- [Trans-European energy infrastructure – revision of guidelines](#)

Renewable fuels:

- [CO2 emissions from shipping – encouraging the use of low-carbon fuels](#)
- [CO2 emissions from shipping – encouraging the use of low-carbon fuels (roadmap)](#)

Carbon pricing:

- [EU Green Deal – Revision of the Energy Taxation Directive](#)
- [EU Green Deal (carbon border adjustment mechanism)](#)
- [EU Green Deal – Revision of the Energy Taxation Directive (roadmap)](#)
- [EU Green Deal (carbon border adjustment mechanism) (roadmap)](#)

Net zero emissions by 2050:

- European climate law – achieving climate neutrality by 2050

Investments for the energy transition:

- Sustainable finance – EU classification system for green investments

Technological neutrality:
- Low-emission vehicles – improving the EU's refuelling/recharging infrastructure
- Sustainable and Smart Mobility Strategy
- CO2 emissions for cars and vans – revision of performance standards

Renewable electrification:

- Clean energy – strategy for energy system integration
- Clean energy – an EU hydrogen strategy
- EU renewable energy rules – review

Energy efficiency:

- EU methane strategy

2019

Carbon pricing:

- Revising the rules for free allocation in the EU Emissions Trading System

Renewable electrification:

- [Energy - European Partnership for clean hydrogen (Horizon Europe programme)](#)
