

REPSOL DISTINGUISHED BY ELIX POLYMERS AS BEST SUPPLIER OF THE YEAR 2018

- **ELIX Polymers recognizes the impact of Repsol's collaboration to reach their goals and objectives in 2018.**
- **This award emphasizes Repsol's experience and proactivity when offering ideas of added value, committing to high quality differentiated products and services.**

Last December, ELIX Polymers awarded Repsol as best supplier of the year, through their annual awards which recognize the collaboration of their suppliers in the fulfillment of their yearly aims and challenges. ELIX awarded Repsol for putting at their disposal all the company's potential and resources, offering added value to their entire value chain and creating solutions that respond to ELIX's needs.

Narcis Vidal, ELIX Polymers' Supply Chain and Technology Services Director, was in charge of handing out the award to Repsol. When presenting the award, David Castañeda, Operations and Business Development & Innovation Director at ELIX Polymers, said: "Repsol has proven experience in its field and has been proactive in presenting ideas to us that add value to our business and our customers. Moreover, Repsol shares important aspects of ELIX Polymers' mission, which is to differentiate itself and offer our customers the best custom solutions, with high quality in both products and services".

On his part, Antonio Portela, Director of Intermediate Products at Repsol mentioned that: "Repsol always takes pride in receiving such prizes, but especially so, coming from one such relevant client, with whom we share a long-standing relationship and especially close in Tarragona". To which Leonardo Mascolo, Repsol's Base Petrochemicals Director, added: "This recognition reinforces our belief in committing to grow together with our customers, firmly convinced on placing our customers in the center of the business, considering them our most valuable asset."

NOTE TO THE EDITOR

Repsol is a global company present along the entire energy value chain. It employs over 25,000 people and sells its products in more than 90 countries, reaching 10 million customers. It operates low-emission power generation assets and is developing renewable photovoltaic and offshore wind projects. The company is a pioneer in the development of mobility initiatives that contribute to innovative solutions and energies for transport.

Repsol produces some 700,000 barrels of oil equivalent per day and has one of Europe's most efficient refining systems.

Repsol manufactures and markets a wide variety of chemical products, ranging from basic petrochemicals to derivatives. In addition, the company has three large petrochemical facilities in Europe where high added-value differentiated products are developed.

The products from Repsol's Chemicals Division are used to manufacture everyday objects that improve people's quality of life, their well-being, and their safety.
