

REPSOL THE BEST VALUED IN THE "BEST POLYMER PRODUCERS AWARDS FOR EUROPE 2020"

- Repsol awarded for the fifth consecutive year in the awards granted by the European Plastics Converters association (EuPC), receiving four of the ten awards.
- The company has received the Best Producer Award for High Density Polyethylene (HDPE), Low Density Polyethylene (LDPE), Polypropylene (PP), and the overarching award on Circularity covering all polymer types.
- Repsol thanks its clients for recognizing their client-centered and circular economy focused strategy.

4 of the 10
awards have
gone to Repsol

Repsol has been awarded for the fifth consecutive year by the European Plastics Converters association (EuPC), bringing together the main European polymer customers. Every year, the European plastics industry chooses the best producers of polymers in Europe. The company has been distinguished with four awards in this edition of the "Best Polymer Producers Awards for Europe," including the global Circularity award, being the only company awarded in more than one category.

The "Best Polymer Producers Awards for Europe" result from the voting of the polymer converters from all over Europe and measure the performance of the European polymer producers. It should be noted that, according to information provided by EuPC, the number of participants in online voting has continued to increase for the fourth consecutive year, since the awards started in 2016, despite the difficult situation caused by the COVID-19 pandemic.

It is the fifth consecutive year that Repsol has been recognized in these awards.

On this occasion, nine products and a global category of Circularity were voted. Out of the ten categories, Repsol has been awarded in four of them with the High Density Polyethylene (HDPE) Best Producer Award, the Low Density Polyethylene (LDPE) Best Producer Award, the Polypropylene (PP) Best Producer Award, and with the overarching award on Circularity covering all polymer types.

This distinction further encourages Repsol to continue working on its customer-centered strategy. The award in the circularity category constitutes for Repsol a recognition by its clients

+200 Circular
economy
projects

A key lever for Repsol to reach its goal of net zero emissions by 2050

of the [circular economy strategy](#), which since 2016 it has been implementing as one of its key levers to be a net-zero emissions company by 2050.

Once again, Repsol receives these awards as an incentive to continue improving itself and offering the best value proposition to its customers. Repsol values the trust of its customers during these five successive years, serving as a stimulus to continue working in this same line in the future.
