# 1 Our vision of sustainability

**At Repsol, we contribute to sustainable development** by seeking to satisfy the growing demand for energy, which is essential for the fulfillment of people's fundamental rights, and by creating value in both the short and long term.

We maximize our positive impact and minimize our negative impact on society and the environment throughout our value chain by acting ethically and transparently. In doing so, we seek to comply not only with the regulations in force but also with the main international standards.

Under these premises, our sustainability model incorporates ethical, environmental, and social considerations into our decision-making process, based on dialogue with stakeholders. We do this every year, creating initiatives that address the concerns of these stakeholders. This is how the **Sustainability Plans** — action plans that are available to the public and created on an annual basis — are born. The **Global Sustainability Plan** is the roadmap forming the basis for deployment of **Local Plans**. The plans also contain commitments in relation to the local context.

# The **Sustainability Plans** are put together on the basis of the **six axes** of Repsol's Sustainability Model.

We want to be part of the solution to climate change

We consume the resources needed to generate power more efficiently and with the least possible impact

We encourage innovation and incorporate technological advances to improve and develop ourselves and our environment

# Safe and secure operation

We guarantee the safety and security of our employees, contractors, partners, and the local community

We are committed to people and promote their development and social environment

We act responsibly and fully where we are present

# **Sustainable Development Goals**

At Repsol we support the United Nations' **2030 Agenda** for Sustainable Development and use the 17 Sustainable Development Goals (SDGs) as a reference when defining our priorities.

We believe that we must focus on the SDGs in which we can maximize our impact. Thus, regarding the company's strategic plan, the material issues and the local contribution in each of the Sustainability Plans, the following SDGs have been selected:

Given our role in access to affordable energy, our contribution to social economic development and the fight against climate change, we have prioritized SDGs 7, 8 and 13.

We believe that the most efficient way of contributing to the 2030 Agenda is to collaborate with other entities

We believe that the most efficient way of contributing to the 2030 Agenda is to collaborate with other entities.

Given our commitment to the optimization of water management, our support for Innovation and Technology, and our focus on the Circular Economy, we have prioritized SDGs 6, 9 and 12.

In 2021, we are publishing our annual SDG report for the second time.

We want to make our contributions to the 2030 Agenda clear by publishing more than 30 indicators and commitments, painting a panorama of the efforts we make all around the Company, both locally and globally, to provide solutions to the social challenges we face.

We want to be agents of environmental and social change in the territories in which we operate. We have the resources, the ambition and, most importantly, the commitment we need. That is our ambition, and the United Nations 2030 Sustainable Development Agenda shows us the way that we can make this happen.

# **Sustainable Development Goals**

The **actions** of which this **Plan** is composed, defined in due consideration of the local context, help support **2030 Agenda** by addressing the following goals:

# Climate change

### At Repsol, we contribute to sustainable development...

We share society's concern about the effect that human activity is having on the climate and we are firmly committed to the aspiration of limiting the increase in the planet's global average temperature well below 2°C with regard to pre-industrial levels.

Our challenge is to supply energy in a safe, efficient, accessible and sustainable manner, reducing Greenhouse Gas (GHG) emissions in line with the objectives of the Paris Agreement and the Sustainable Development Goals of the United Nations (SDGs).

In December 2019 Repsol publicly expressed that it would align its strategy to be a net-zero emissions company by 2050, making it the first in its sector to set this ambitious goal. Our 2021-2025 Strategic Plan sets out the roadmap for continuing to successfully advance the energy transition. With the technological advances available, we anticipate achieving between 80% and 90% net emissions reductions by that year, and we are committed to applying the best technologies to raise this figure, including CO<sub>2</sub> capture, use and storage. Without major technological disruptions, Repsol would rely on natural carbon sinks to reach its goal of zero emissions by 2050.

Accordingly, we have joined the Oil and Gas Climate Initiative (OGCI) to share best practices and technology solutions, and participate in the OGCI Climate Investment Fund, to channel the committed investment of \$1 billion over ten years in the development of technologies to reduce GHG emissions on a significant scale.

There follows a list of Sustainability Plan actions in this regard.

# Climate change

#### **Action**

Perform a CO<sub>2</sub> capture and injection study for Sakakemang block.

### **Description**

The Carbon Geological Storage Group will carry out the  $CO_2$  capture and injection study for Sakakemang. It aims at the geological study in the Dayung and Gelam fields within the corridor block, so that in the future development of the entire Sakakemang field, all  $CO_2$  produced, as well as the  $CO_2$  produced by Corridor, can be captured and re-injected with a substantial decrease at country level of  $CO_2$  emissions.

#### **Indicator**

Complete the geomechanics and dynamics study.

### **Environment**

### At Repsol, we contribute to sustainable development...

In order to guarantee society sustainable growth over time, at Repsol we work prioritizing the actions necessary to minimize environmental impacts. For this, we optimize the use of the resources that we use in our industrial processes in the manufacture of our products, including water, and we minimize emissions to air and water, as well as the generation of waste, giving them a second life whenever possible.

The conservation of natural capital and biodiversity, as well as the implementation of the circular economy, are key aspects when developing our activity.

Our Safety and Environment Strategy defines the key lines of action on which the company will focus its environmental efforts by 2025: we must be able to quantify and assess the impacts and dependencies on the environment when making business decisions, focusing on the most sensitive aspects of our operations. Our goal is to maintain the social license to operate through excellent environmental management, showing that we are sustainable throughout our entire value chain, both in our projects and operations, as well as in the products and services that we make available to our customers. customers.

This Sustainability Plan is committed to courses of action in accordance with the lines of work which Repsol operates in terms of sustainability.

# **Environment**

#### **Action**

Implement the reclamation for revegetation of abandoned exploration well within three years process.

### **Description**

We will carry out the implementation of the reclamation for reforestation of the abandoned exploration wells Ayu-1, Elok-1 and Anggun-1 and include the road access to the wells which will be implemented within three years.

Seeds need to be planted in 625 ha, with a distance between seeds of 4 m X 4 m, requiring a total of 14,300 trees.

A monitoring report will be provided to local forestry department every six months and maintenance acceptability is 80% seed grow in the 3th year.

#### **Indicator**

Plant seeds in 50% of 625 ha, requiring a total of 7,000 trees.

### **Environment**

#### **Action**

Raise the awareness and competence for safety and environment among our employees.

#### **Description**

We will deliver the online course Introduction to Safety and the Environment to all Jakarta office employees. The course will focus on circular economy, climate change, water management, waste management, natural capital and biodiversity, incident management and learning, risks and impacts and safety culture of Repsol.

#### **Indicator**

Reach a 90 % participation of Jakarta office personnel.

### **Environment**

#### **Action**

Provide environmental education and awareness to students and communities in the form of online program Repsol Goes to School.

### **Description**

We will conduct an environmental awareness program aimed for high school or college students in virtual session due to COVID-19 condition.

#### **Indicator**

Conduct one session of Virtual Repsol Goes to School, participated by students from school or college in Jambi and South Sumatra Province.

# Innovation and technology

#### At Repsol, we contribute to sustainable development...

Advancing in the decarbonization of processes and products and in Sustainability is a key objective in the future strategy of our industry. For this reason, at Repsol, we are strongly committed to the decarbonisation of our industrial and transport production, counting on a strong investment in R&D&i at our research center (Repsol Technology Lab).

Also since its creation in 2017, Repsol's Digitialization Program has maintained a firm commitment to Sustainability. On a transversal basis, this program is contributing to the digital transformation of Repsol's business units, obtaining impacts throughout the entire value chain.

Repsol Technology Lab promotes open innovation, that is, collaboration with the innovative ecosystem by building a work environment capable of accelerating the full deployment time of disruptive technological products. This collaboration model is essential to obtain successful results and build more efficient and sustainable energy systems.

As an example of open innovation, Repsol has an investment fund that is intended to acquire stakes in start-ups that offer solutions in three areas of action: decarbonisation and circular economy, advanced mobility and renewables, and digital technology and asset optimization.

This Sustainability Plan includes a commitment to the following actions, in step with the lines of work that Repsol has set on this axis of sustainability.

# Innovation and technology

#### **Action**

Drive continous improvement in our innovation and technological development.

### **Description**

We will provide Petro Technical vendor managed hardware and software service that will improve efficiency (time and cost), add value with scalability, accessibility and collaborative capacities.

#### **Indicator**

Implement the cloud collaboration environment for Petro Technical user's system.

# Innovation and technology

#### **Action**

Implement SharePoint 365 digital forms.

### **Description**

We will use SharePoint 365 to develop the digital visitor form to encourage office paperless program which will reduce paper-based documents in the office.

#### **Indicator**

Implement the visitor form.

# Safe and secure operation

#### At Repsol, we contribute to sustainable development...

We pursue the ambition of Zero Accidents by demanding a high level of safety in our processes and facilities, with special attention to the protection of people and the environment that surrounds us, also working to raise awareness of our suppliers and contractors.

As a result of the conviction that safety is the basis for the creation of value, excellence and responsibility, our Safety and Environment Strategy for 2025 sets the key lines of action on which to focus our safety efforts: promoting the culture, transformative leadership and safety awareness. In addition, as a sign of our commitment, the safety objectives have an impact on the variable remuneration of our employees of 10%.

In the current global context, with the acceleration of the digitalization process of society, secure operation also extends to digital operations, and cybersecurity is gaining more and more importance. We have been working on cycles of improvement and adaptation our processes and information technologies for more than a decade. Also aware that it is an environment that is constantly evolving and gaining complexity, far from stabilizing the effort, we increase it in each cycle.

Below we demonstrate courses of action pointing to our commitment to safe and secure operation.

# Safe and secure operation

#### **Action**

Conduct online floorwarden training for all Jakarta office's floorwarden personnel.

### **Description**

We will deliver online floorwarden training which focuses on emergency evacuation and emergency condition in the Sequis Tower as new Jakarta office building. It will give knowledge and socialize the Emergecy Procedure that must be performed in case an emergency happens.

#### **Indicator**

Ensure all floorwarden personnel of Jakarta office participate in the training.

# Safe and secure operation

#### **Action**

Launch a campaign to encourage employees to perform the 10 Basic Safety Rules (BSR) online training.

### **Description**

We will encourage Jakarta office employees to participate in the 10 Basic Safety Rules (BSR) online training which aims to increase their knowledge about the hazards and risks that can occur in Repsol operations.

#### **Indicator**

Ensure 90% of Jakarta office employees participate in the course.

# **People**

### At Repsol, we contribute to sustainable development...

Our employees, communities, commercial relations, and customers are a primary axis in our sustainability model.

We know that the **people that make up Repsol** are our main competitive advantage and the key to being a sustainable company. We are committed to equal opportunities, the integration of people with disabilities, multi-culturalism, work-life balance, health and wellness, training and development, and attracting and retaining talent.

Business operations are carried out in an increasingly demanding and informed social environment, and companies strive to **establish sound relationships** based on the principles of respect, cultural sensitivity, integrity, accountability, transparency, good faith, and non-discrimination with the people they interact with, particularly local communities. At Repsol, we are committed to continue respecting human rights, and this means preventing our activities from having negative consequences for local people and, if such a thing does occur, doing everything possible to repair the damage done.

This axis includes the following initiatives.

# **People**

#### **Action**

Conduct health and safety awareness sessions for Indonesia Repsol employees and families.

### **Description**

We will conduct four sessions of safety and health awareness for Indonesia Repsol employees and families. The sessions will be delivered online and will focus on various topics such as:

- 1. Covid-19 situation and current awareness
- 2. Ergonomics while working from home
- 3. Environmental awareness
- 4. Fire safety awareness

#### **Indicator**

Conduct four sessions and reach a 70% participation of Jakarta office employees and families if necessary.

# **People**

#### **Action**

Support Voluntary Principles on Security and Human Rights throughout our operations.

### **Description**

We will deliver Voluntary Principals on Security and Human Right training for security guard to give knowledge and understanding of how to conduct their daily tasks in compliance with the VPSHR and with the company's policies regarding human rights and ethical conduct. Specifically, participants will be able to demonstrate professional proficiency with regard to the use of force, or other coercive measures, in accordance with human rights standards and ethical conduct.

#### **Indicator**

Achieve a 90% participation of security guards.

# **People**

#### **Action**

Promote a work-life balance among our employees by rolling out the Teleworking Program.

### **Description**

We will introduce the Teleworking Program to facilitate flexibility for employee in managing the balance between their personal and professional life.

The preparation of the program will involve setting up policy and guideline in order for the program to be ready for implementation once country pandemic condition permits.

#### **Indicator**

Create and finalize the Country Policy and Guidance on Teleworking Program.

# **People**

#### Action

Foster employee engagement by conducting Initiatives or activities that will nurture positive employee experiences.

### **Description**

We will conduct several activities as part of employee engagement initiatives, such as employee birthday celebrations, new joiner welcoming sessions, virtual brunches with leaders and virtual team activities.

#### **Indicator**

Conduct employee birthday celebrations on monthly basis.

Conduct new joiner welcoming session every quarter.

Conduct virtual brunch with leader for each department.

# **People**

#### **Action**

Continue to work on employee's awareness on the importance of equality and inclusivity in work environment.

# **Description**

We will encourage employee to take Unconscious Bias Training as an effort to increase their awareness on the importance of equality.

#### **Indicator**

Ensure 75% of permanent / direct hire employees complete the Unconscious Bias Training.

# **People**

#### **Action**

Conduct a social baseline study for the new block (South Sakakemang).

### **Description**

We will carry out a social baseline study which aims to provide an updated in-depth and thorough information on the social condition of the community within the operation area. South Sakakemang is the quite new awarded block and having the study occurred for this new asset will be beneficial in Repsol's business plan especially in terms of engaging the local stakeholders.

#### **Indicator**

Perform a social baseline study for South Sakakemang block.

# **People**

#### **Action**

Provide donations and awareness campaign to community around operations area regarding the COVID-19 countermeasures.

### **Description**

The COVID-19 pandemic still occurs in the world, including in Indonesia. Repsol is committed to being present and providing added value in the community to help deal with COVID-19. We will provide assistance with health and sanitation equipment to support new lifestyles related to COVID-19 as well as campaigns for discipline in implementing health protocols.

#### **Indicator**

Perform minimum one donation activity for the community around Sakakemang Block in regards to the COVID-19 countermeasures.

Perform minimum one donation activity for the community around Andaman Block in regards to the COVID-19 countermeasures.

# **Ethics and transparency**

### At Repsol, we contribute to sustainable development...

We act with integrity in all countries in which we are present. Our ethical conduct involves strict compliance with both the letter and the spirit of the law.

On this axis, we establish the set of actions that ensure the company promotes and encourages a culture of integrity and responsibility for all Repsol employees, as well as our suppliers, contractors, and business partners.

We also define **transparency and accountability** as differential elements in the Repsol sustainability model. To be credible, it must be consistently transparent. We want to be publicly recognized as an honest and transparent company in tax-related matters. Thus, **we are engaged in EITI** (Extractive Industries Transparency Initiative) with the aim of strength our cooperative relationships with the administrations.

In this Sustainability Plan, we have committed to actions that will help the company overcome the challenges we have set for ourselves in this area, while responding to the main expectations of our stakeholders

#### **Action**

Continue to promote ethics and transparency through good governance practices in the form of annual refresher training for Expense Report and Advances.

### **Description**

We will roll out Repsol's Expense Claim and Advance norms to all employees to give common understanding. We will include real life examples for discussion points and we will focus on government officials interactions, including specifics when dealing with them for entertainment, perdiem, etc.

#### **Indicator**

Achieve 100% participation of Jakarta office employees.

# **Ethics and transparency**

#### **Action**

Train and certificate our Tender Committee in the Indonesian regulation for supply chain management.

### **Description**

We will establish a Tender Committee structure to comply with local Indonesia government regulation for supply chain. All appointed personnel to be Tender Committee shall have valid certificate based on the said regulation.

#### **Indicator**

Ensure all personnel appointed as Tender Committee has passed and has been certified.

# **Ethics and transparency**

#### **Action**

Promote ethics and transparency relating to anticorruption and compliance in the form of annual compliance training.

### **Description**

We will conduct our annual compliance program to refresh for all employees the compliance norms (Anticorruption, Gift and hospitality, Third party due dilligence and Conflict of interest), as well as introduce the new norm on Key factor in managing relationship with government official. The training is also a media to share real situation on site which employees are coping, and to seek mitigation and solution for such real issues.

#### **Indicator**

Perform annual training for compliance for all employees (minimum 80% of participation).

Introduce new norm of Key factors in managing relationship with government.

Socialize Repsol's compliance norms with the operator of the asset (for the asset in which we are non-operator).

# 3 Process of updating the Plan

## This Sustainability Plan is a dynamic document.

Each year we will give an account of the extent to which the actions that make up this Plan have been carried out by publishing a monitoring report.

Moreover, given that the expectations of our stakeholders and the issues that concern them are changeable and subject to the evolution of events during the course of the year, this Plan will be updated annually with new actions or the reformulation of existing ones to adapt them to the new situation.

The successive updates of the plan will leave behind them a trail of completed actions that, collectively, are a contribution of our company to sustainable development.
