Legal Notice

This Sustainability Plan includes a set of actions which, in whole or in part, go beyond what is required by law and are aimed to contribute to sustainable development. Participating companies of Repsol Group have the firm intention to undertake and fulfill them. However, they reserve the right to modify, postpone or cancel their implementation without incurring liability, but undertake to publicly justify these possible cases.

1 Our vision of sustainability

At Repsol, we contribute to sustainable development by seeking to satisfy the growing demand for energy, which is essential for the fulfillment of people's fundamental rights, and by creating value in both the short and long term.

We maximize our positive impact and minimize our negative impact on society and the environment throughout our value chain by acting ethically and transparently. In doing so, we seek to comply not only with the regulations in force but also with the main international standards.

Under these premises, our sustainability model incorporates ethical, environmental, and social considerations into our decision-making process, based on dialogue with stakeholders. We do this every year, creating initiatives that address the concerns of these stakeholders. This is how the **Sustainability Plans** — action plans that are available to the public and created on an annual basis — are born. The **Global Sustainability Plan** is the roadmap forming the basis for deployment of **Local Plans**. The plans also contain commitments in relation to the local context.

The **Sustainability Plans** are put together on the basis of the **six axes** of Repsol's Sustainability Model.

Climate change

We want to be part of the solution to climate change

Environment

We consume the resources needed to generate power more efficiently and with the least possible impact

Innovation and technology

We encourage innovation and incorporate technological advances to improve and develop ourselves and our environment

Safe and secure operation

We guarantee the safety and security of our employees, contractors, partners, and the local community

People

We are committed to people and promote their development and social environment

Ethics and transparency

We act responsibly and fully where we are present

Sustainable Development Goals

At Repsol we support the United Nations' **2030 Agenda** for Sustainable Development and use the 17 Sustainable Development Goals (SDGs) as a reference when defining our priorities.

We believe that we must focus on the SDGs in which we can maximize our impact. Thus, regarding the company's strategic plan, the material issues and the local contribution in each of the Sustainability Plans, the following SDGs have been selected:

Given our role in access to affordable energy, our contribution to social economic development and the fight against climate change, we have prioritized SDGs 7, 8 and 13.

We believe that the most efficient way of contributing to the 2030 Agenda is to collaborate with other entities

We believe that the most efficient way of contributing to the 2030 Agenda is to collaborate with other entities.

Given our commitment to the optimization of water management, our support for Innovation and Technology, and our focus on the Circular Economy, we have prioritized SDGs 6, 9 and 12.

In 2021, we are publishing our annual SDG report for the second time.

We want to make our contributions to the 2030 Agenda clear by publishing more than 30 indicators and commitments, painting a panorama of the efforts we make all around the Company, both locally and globally, to provide solutions to the social challenges we face.

We want to be agents of environmental and social change in the territories in which we operate. We have the resources, the ambition and, most importantly, the commitment we need. That is our ambition, and the United Nations 2030 Sustainable Development Agenda shows us the way that we can make this happen.

Sustainable Development Goals

The **actions** of which this **Plan** is composed, defined in due consideration of the local context, help support **2030 Agenda** by addressing the following goals:

Climate change

At Repsol, we contribute to sustainable development...

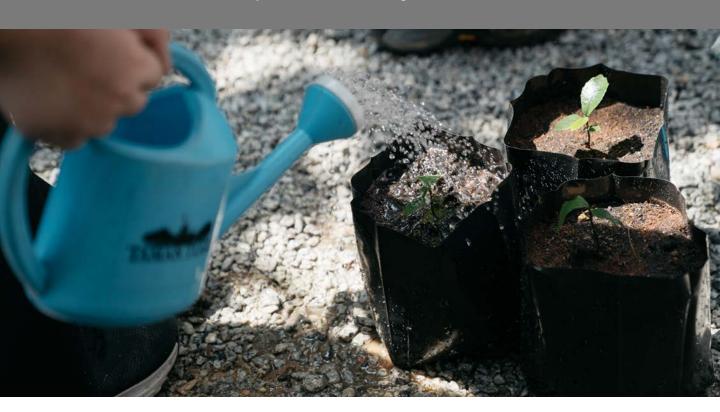

We share society's concern about the effect that human activity is having on the climate and we are firmly committed to the aspiration of limiting the increase in the planet's global average temperature well below 2°C with regard to pre-industrial levels.

Our challenge is to supply energy in a safe, efficient, accessible and sustainable manner, reducing Greenhouse Gas (GHG) emissions in line with the objectives of the Paris Agreement and the Sustainable Development Goals of the United Nations (SDGs).

In December 2019 Repsol publicly expressed that it would align its strategy to be a net-zero emissions company by 2050, making it the first in its sector to set this ambitious goal. Our 2021-2025 Strategic Plan sets out the roadmap for continuing to successfully advance the energy transition. With the technological advances available, we anticipate achieving between 80% and 90% net emissions reductions by that year, and we are committed to applying the best technologies to raise this figure, including CO₂ capture, use and storage. Without major technological disruptions, Repsol would rely on natural carbon sinks to reach its goal of zero emissions by 2050.

Accordingly, we have joined the Oil and Gas Climate Initiative (OGCI) to share best practices and technology solutions, and participate in the OGCI Climate Investment Fund, to channel the committed investment of \$1 billion over ten years in the development of technologies to reduce GHG emissions on a significant scale.

There follows a list of Sustainability Plan actions in this regard.

Action

Drive GHG reduction initiatives.

Description

We will implement a series of GHG reduction initiatives in year 2021 which include the initiative to reduce the emission of methane by converting one of the vent streams to flare. This is inline with Repsol's commitment in moving towards a low-emissions future.

Indicator

Quantify monthly and verify by external auditor at the end of the year GHG reduction achieved by this initiative.

Environment

At Repsol, we contribute to sustainable development...

In order to guarantee society sustainable growth over time, at Repsol we work prioritizing the actions necessary to minimize environmental impacts. For this, we optimize the use of the resources that we use in our industrial processes in the manufacture of our products, including water, and we minimize emissions to air and water, as well as the generation of waste, giving them a second life whenever possible.

The conservation of natural capital and biodiversity, as well as the implementation of the circular economy, are key aspects when developing our activity.

Our Safety and Environment Strategy defines the key lines of action on which the company will focus its environmental efforts by 2025: we must be able to quantify and assess the impacts and dependencies on the environment when making business decisions, focusing on the most sensitive aspects of our operations. Our goal is to maintain the social license to operate through excellent environmental management, showing that we are sustainable throughout our entire value chain, both in our projects and operations, as well as in the products and services that we make available to our customers. customers.

This Sustainability Plan is committed to courses of action in accordance with the lines of work which Repsol operates in terms of sustainability.

Environment

Action

Promote environmental awareness among schoolchildren.

Description

We will organise an environmental awareness camp for schoolchildren in conjunction with World Environment Day.

Indicator

Conduct one environmental awareness camp.

Environment

Action

Reduce the volume of waste for final disposal.

Description

We will reduce the volume of scheduled waste SW409 (contaminated container) for final disposal by sending it to a waste recovery contractor.

Indicator

Send 50% of scheduled waste SW409 generated at one operating asset to waste recovery contractor.

Safe and secure operation

At Repsol, we contribute to sustainable development...

We pursue the ambition of Zero Accidents by demanding a high level of safety in our processes and facilities, with special attention to the protection of people and the environment that surrounds us, also working to raise awareness of our suppliers and contractors.

As a result of the conviction that safety is the basis for the creation of value, excellence and responsibility, our Safety and Environment Strategy for 2025 sets the key lines of action on which to focus our safety efforts: promoting the culture, transformative leadership and safety awareness. In addition, as a sign of our commitment, the safety objectives have an impact on the variable remuneration of our employees of 10%.

In the current global context, with the acceleration of the digitalization process of society, secure operation also extends to digital operations, and cybersecurity is gaining more and more importance. We have been working on cycles of improvement and adaptation our processes and information technologies for more than a decade. Also aware that it is an environment that is constantly evolving and gaining complexity, far from stabilizing the effort, we increase it in each cycle.

Below we demonstrate courses of action pointing to our commitment to safe and secure operation.

Safe and secure operation

Action

Raise awareness on personal safety through safety campaigns with primary school children.

Description

We will collaborate with the Department of Education, Police, Fire & Rescue Department and Malaysia Civil Defence Force to organise a Safety Day among schoolchildren. We aim to promote and nurture personal safety awareness through interactive activities and fun quiz for greater traction and focus.

Indicator

Conduct two programs (Terengganu & Sabah) this year.

Safe and secure operation

Action

Measure safety compliance assessment to selected safety critical areas at offshore platform.

Description

We will develop terms of reference for assurance and assessment.

We will perform on the job safety assessments against selected areas as per the governing requirement guided by terms of reference.

Indicator

Conduct four assessments at offshore platforms on selected areas.

Safe and secure operation

Action

Enhance our business continuity plan.

Description

We will continue developing and updating our business continuity plan in case of COVID-19 cases in the field to avoid and minimize disruption to operations and production.

Indicator

Contain number of COVID cases in the production facilities.

People

At Repsol, we contribute to sustainable development...

Our employees, communities, commercial relations, and customers are a primary axis in our sustainability model.

We know that the **people that make up Repsol** are our main competitive advantage and the key to being a sustainable company. We are committed to equal opportunities, the integration of people with disabilities, multi-culturalism, work-life balance, health and wellness, training and development, and attracting and retaining talent.

Business operations are carried out in an increasingly demanding and informed social environment, and companies strive to **establish sound relationships** based on the principles of respect, cultural sensitivity, integrity, accountability, transparency, good faith, and non-discrimination with the people they interact with, particularly local communities. At Repsol, we are committed to continue respecting human rights, and this means preventing our activities from having negative consequences for local people and, if such a thing does occur, doing everything possible to repair the damage done.

This axis includes the following initiatives.

People

Action

Promote a mentoring program with Repsol's scholars.

Description

We will organize a mentoring program to help Repsol scholars identify, achieve career and skills development and personal growth goals as well as preparing them for the employment world.

Indicator

Mentor 40 Repsol scholars online.

People

Action

Develop a learning and development framework.

Description

We will promote an employee centric culture that improves their experience and supports their development. With this framework, we will be able to provide the employees a more solid and reference with regards to training and development.

Indicator

Deploy the framework the first semester.

People

Action

Promote Repsol Aspiring Women's (RAW) Network.

Description

We will launch Repsol Aspiring Women's Network, an initiative which embraces diversity and inclusivity of women talents in our company. It is a platform for women to learn and grow from personalities within and outside the industry as well as being a haven for women to share their thoughts and concerns candidly without fear.

Indicator

Establish formal committee members.

Organize one sharing session.

People

Action

Promote the United Nations 2030 Agenda among our employees.

Description

We will make sure our employees know the 2030 Agenda and its 17 Sustainable Development Goals through a training course. We will highlight the role of the private sector and Repsol's challenges to maximize its contribution.

Indicator

Train 100 % of employees.

People

Action

Promote educational excellence amongst children from disadvantaged groups.

Description

We will award scholarships to university students in collaboration with five Malaysia partner universities. In selecting the students, besides educational merits, their family background will also be given consideration in order to ensure the benefits goes to the most deserving candidates.

Indicator

Award 20 scholarships by end of 2021, incorporating family income as part of the evaluation criteria.

Carry out two Motivational Award programs; one each in Labuan & Sabah.

People

Action

Train security personnel on Voluntary Principles on Security and Human Rights.

Description

We will carry out awareness programmes and sharing of information sessions on public and private security providers' efforts to implement or assist in the implementation of the voluntary principles with other participants and the public.

We will develop systems for reporting and investigating allegations of human rights abuses.

We will collaborate with relevant stakeholders to ensure compliance of our business operations.

Indicator

Train 100% security personnel.

Develop systems for reporting and investigating allegations of human rights abuses.

Collaborate with relevant government authorities, non-governmental organizations and other entities to ensure business compliance.

People

Action

Empower communities through capacity building programs enabling them to generate sustainable income.

Description

We will work with selected NGOs in Sabah to develop capacity building programs that will enable selected communities or groups to generate sustainable alternative income. This is done through Project Seaweed Rearing with Fishermen community.

Indicator

Complete the program by end of 2021.

Ethics and transparency

At Repsol, we contribute to sustainable development...

We act with integrity in all countries in which we are present. Our ethical conduct involves strict compliance with both the letter and the spirit of the law.

On this axis, we establish the set of actions that ensure the company promotes and encourages a culture of integrity and responsibility for all Repsol employees, as well as our suppliers, contractors, and business partners.

We also define **transparency and accountability** as differential elements in the Repsol sustainability model. To be credible, it must be consistently transparent. We want to be publicly recognized as an honest and transparent company in tax-related matters. Thus, **we are engaged in EITI** (Extractive Industries Transparency Initiative) with the aim of strength our cooperative relationships with the administrations.

In this Sustainability Plan, we have committed to actions that will help the company overcome the challenges we have set for ourselves in this area, while responding to the main expectations of our stakeholders

Action

Increase knowledge of personal data protection within the employees of Malaysia Business Unit.

Description

We will provide or procure training to employees on personal data protection, and we will review and update Repsol's data protection notices if needed.

Indicator

Train 10% of employees, particularly the functions that handle personal data of others in carrying their job.

3 Process of updating the Plan

This Sustainability Plan is a dynamic document.

Each year we will give an account of the extent to which the actions that make up this Plan have been carried out by publishing a monitoring report.

Moreover, given that the expectations of our stakeholders and the issues that concern them are changeable and subject to the evolution of events during the course of the year, this Plan will be updated annually with new actions or the reformulation of existing ones to adapt them to the new situation.

The successive updates of the plan will leave behind them a trail of completed actions that, collectively, are a contribution of our company to sustainable development.
