REDEZON C-250
RUBBER WAXES

Specialties

Description
The product Redezon C-250 is a mineral wax derived from petroleum that acts as a physical antiozonant in unsaturated rubber mixtures.

Applications
Specially recommended for technical rubber products or tyre manufacturing.
Redezon C-250 migrates to the rubber surface forming a thin layer protecting as an outstanding physical barrier against the ozone attack to the double bonds of the rubber structure.
The specially designed carbon distribution of the Redezon C-250 makes it recommendable for tyre manufacturing giving full protection in mild climate conditions.
It is formulated in order to avoid caking so it can be used for long periods under appropriate storage conditions.

Presentation
The product Redezon C-250 is packaged in 25 kg. bags.
Do not store at temperatures above 40°C, and avoid moisture and direct sunlight.
The product should be used within two years of being packaged.

Unless indicated otherwise, the values of this technical datasheet must be considered as typical values
