with auditors' report

Management report

(Amounts in thousands of U.S. Dollars)

The Managing Directors present their report together with the audited financial statements for the year ended December 31, 2007.

Introduction

The company belongs to the Repsol YPF Group, a Spanish integrated oil company engaged in all aspects of the petroleum business and one of the largest industrial groups in Spain. The company is a wholly owned subsidiary of Repsol YPF, S.A., Madrid, Spain.

The issued and paid-in share capital of the company amounts to USD 442,480.

Activities

Its principal activities consist of financing and investing in subsidiaries and affiliated companies.

Funds denominated in U.S. Dollars and in Euros are raised on the international capital markets by using a short-term commercial paper programme, a medium and long-term notes program and some bank credit facilities, which are lent to subsidiaries and affiliated companies, also in other currencies than U.S. Dollars. In this case the company hedges the foreign currency exposure by entering into foreign exchange contracts with major international banks.

Repsol YPF, S.A.'s acquisition of the Argentine oil and gas company YPF, S.A. pursuant to a cash tender offer launched on April 30, 1999, required an increase in the indebtedness levels of the Repsol YPF Group. In this respect, the company issued in 1999 notes amounting to EUR 6,650 million, EUR 3,250 million of which matured in the year 2000, EUR 1,000 million of which matured in the year 2001, EUR 1,000 million of which matured in the year 2002 and EUR 1,400 million of which matured in the year 2004.

Currently, as part of the required Repsol Group financing needs the existing bonds are the following, issued in 2000 for an amount of EUR 1,000 million which matures in 2010, issued in 2001 for an amount of EUR 175 million which matures in 2010, issued in 2003 for an amount of EUR 1,000 million which matures in 2013 and issued in 2004 for an amount of EUR 1,000 million which matures in 2014.

Bonds issued in 2001, amounting EUR 750 million, and 2003, amounting EUR 150 million, matured in 2006.

In February 2007 two bonds were issued amounting EUR 750 million which matures in February 2012 and EUR 500 million that matures in February 2017.

The company is the holder of shares in subsidiaries. These investments have been valued at cost or if permanently impaired, at lower recoverable value.

Result for the Year

The company made a profit of USD 229,819 (2006: USD 462,834 profit). This profit is primarily caused by a positive result from dividends from subsidiaries and interest.

Future Outlook

It is envisaged that the company will continue to provide loan capital to subsidiaries and affiliated companies. The future level of profits will be dependent on developments of the investments and financing activities.

The company does not foresee changes in the number of personnel in the future and does not perform any R&D activities.

10 Long term debt

In September 2006 a bank loan agreement from Societe Generale was granted for EUR 150 million, with termination date 2009, and bearing an interest rate equal to Euribor 3 months plus a margin of 0.20% per annum.

11 Short term loans from affiliates

Liabilities with a remaining period up to 1 year, including the short-term portion of long-term liabilities, are presented under short-term liabilities.

The short-term liabilities comprise credit facilities denominated in U.S. Dollar, received from affiliated companies for an amount of USD 590,445 at an average interest rate of 5.38%.

12 Covenants in RIF B.V.'s indebtedness

The bank loans generally contain customary covenants for contracts of this nature, including negative pledge, material adverse change and cross-default clauses.

The issues of unsecured and unsubordinated Euronotes representing EUR 4,425 million guaranteed by Repsol YPF, S.A., contain clauses whereby the company undertakes to pay interest when due and the liabilities at maturity and the guarantor, subject to certain exceptions, undertakes not to create encumbrances on its assets in relation to these issues or to future issues of debt securities.

In the event of a default under any series of the bonds, the trustee, at his sole discretion or at the request of the holders of at least one-fifth or one quarter of the bonds, depending upon the series, can declare the bonds of that series to be due and payable.

Almost all of our total outstanding debt is subject to cross-default provisions. These provisions may be triggered if an event of default occurs with respect to indebtedness equal to or exceeding USD 20 million or 0.25% of Repsol YPF's shareholders' equity.

As a result of these cross-default provisions, a default on the part of Repsol YPF, YPF or any subsidiary covered by such provisions could result in a substantial portion of our debt being declared in default or accelerated. Repsol YPF believes that none of its debt or that of any of its subsidiaries is currently in default.

The company's directors believe that at the date of this writing there are no reasons, nor will there foreseeably be in the future, which will make it necessary to apply the clauses providing for early maturity of the debt.

13 Interest Income and Expense

An amount of USD 431,479 (2006: USD 371,185) relates to interest income from affiliated companies. An amount of USD 6,671 (2006: USD 8,400) relates to third parties.

The company, Repsol Netherlands Finance B.V., Repsol LNG Port of Spain B.V. and Repsol Investeringen B.V constitute a fiscal unity. Taxes for the fiscal unity have been fully allocated to each subsidiary. The company is severally and jointly liable for the total corporate income tax payable of the fiscal unity.

16 Financial Instruments

In the normal course of business the company uses forward exchange contracts, to hedge currency exchange rate risks resulting from financing arrangements in foreign currencies. Financial instruments include those recognized in the balance sheet (on-balance sheet) and off-balance sheet financial instruments.

The estimated fair value of a financial instrument is the amount for which an asset could be exchanged, or a liability settled, between knowledgeable, willing parties in an arm's length transaction. Fair values are determined from listed market prices, price quotations from banks or pricing models.

The company has procedures and policies in place to control risks related to financial instruments. These policies and procedures include a clear segregation of duties between operating, settlement, accounting and controlling of all financial instruments used. The company's management is involved in the risk management process.

The company attempts to minimize the counterparty credit risk associated with the financial instruments used by selecting counterparties that it assumes to be creditworthy, given their high credit ratings.

The table below summarises by major currency the contractual amounts of the company's foreign exchange contracts in U.S. Dollars as of December 31, 2007. Foreign currency amounts are translated at rates prevailing at the balance sheet date.
